Story

Somewhere in Taipei Taiwan, there was a Cho-Tofu (Stinky TO-FU) stand at the night market. Suddenly, a tiny fairy of the Cho-Tofu puffed out. This fairy was Smery. He himself smelled so bad, that he is now on a journey, accompanied by his lovely dog Snify, to find the ideal scent Cho-Tofu. Wherever Smery goes, everyone pinches their nose, but when that happens, Smery quickly cooks a Cho-Tofu dish to get through.

Now, wearing a traditional oriental culture costume, Smery and Snify bring good-will greeting from Chinese.

Birth of Pretec Stinky TO-FU Series

The famous character "Human TO-FU" was created by DEVILROBOTS, a Japanese designing team. In 2006, to showcase its work "Thrill of Alienation" for the first time in Taiwan, they created a unique character called "Smery." This idea originated from a famous Taiwanese side dish – Stinky TO-FU.

Now, Pretec cooperated with DEVILROBOTS/PHALANX to manufacture a special USB drive combining both storage function and the action figure "Smery." Pretec Stinky TO-FU series is the origination to successfully represent the TO-FU series members' characteristics by a USB drive.
